

A scatter plot with two clusters of data points. The x-axis ranges from 4 to 7, and the y-axis ranges from -150 to 150. The first cluster, located at approximately x=4.3, y=0, consists of 8 blue asterisks. The second cluster, located at approximately x=6.7, y=0, also consists of 8 blue asterisks.

A scatter plot with two clusters of data points. The x-axis ranges from 4 to 7, and the y-axis ranges from -150 to 150. The first cluster, located at approximately x=4.3, y=0, consists of 10 purple asterisks. The second cluster, located at approximately x=6.7, y=0, consists of 10 purple asterisks.

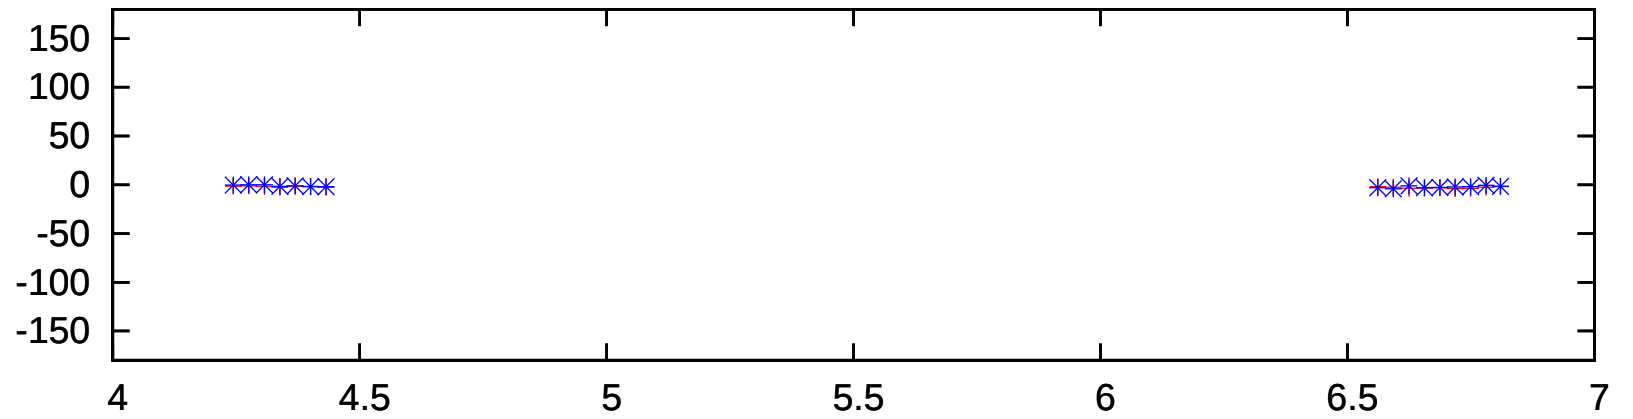

A scatter plot with two clusters of data points. The x-axis ranges from 4 to 7, and the y-axis ranges from -150 to 150. The first cluster, located around x=4.3, y=0, consists of 10 purple asterisks. The second cluster, located around x=6.7, y=-10, consists of 15 purple asterisks.

A scatter plot with two clusters of data points. The x-axis ranges from 4 to 7, and the y-axis ranges from -150 to 150. The first cluster is located around x=4.3 and y=-25, consisting of 10 points. The second cluster is located around x=6.7 and y=-25, consisting of 10 points.

A scatter plot with two clusters of data points. The x-axis ranges from 4 to 7, and the y-axis ranges from -150 to 150. The first cluster, located at approximately x=4.3, y=15, consists of 10 blue asterisks. The second cluster, located at approximately x=6.6, y=15, also consists of 10 blue asterisks.

A scatter plot with the x-axis ranging from 4 to 7 and the y-axis ranging from -150 to 150. The plot displays two distinct clusters of data points, represented by blue 'x' markers. The first cluster is located at approximately x=4.3, y=0, and the second cluster is located at approximately x=6.7, y=0. There are also some red 'x' markers near the blue ones, possibly indicating a different set of data or a different model fit.
