

A scatter plot with two clusters of data points. The x-axis ranges from 18 to 22.5 with major ticks every 0.5 units. The y-axis ranges from -150 to 150 with major ticks every 50 units. The first cluster, located on the left, consists of approximately 10 blue 'x' marks centered at x ≈ 18.4 and y = 0. The second cluster, located on the right, consists of approximately 10 blue 'x' marks centered at x ≈ 22.1 and y = 0.

A scatter plot with two clusters of data points. The x-axis ranges from 18 to 22.5 with major ticks every 0.5 units. The y-axis ranges from -150 to 150 with major ticks every 50 units. The first cluster, located around x=18.3, consists of approximately 15 blue 'x' marks arranged in a horizontal line at y=0. The second cluster, located around x=22.1, also consists of approximately 15 blue 'x' marks arranged in a horizontal line at y=0.
